EXPERIENCE

[Leadcart](), USA — Full Stack Engineer/Team lead

09/2018 - present

I started as a Full Stack Engineer as LC (leadcart). I was responsible for developing business wise requirements into usable features for our target customers, also I was involved with the customers feed loop, which enabled us to take actions faster to make our product better,

We have to build few tools to support our software ecosystem, and we have released our beta last year, and released many patches as we go,

Now we are working on a new version of leadcart, that will be more scalable and provide a much better user experience.

[Gaza Sky Geeks](), Palestine — Quality Assurance

06/2018 - 10/2018

I was responsible for making sure that every member of my team understands the application requirements, and implements them correctly, and we have a certain level of code standards in our code bases.

[University Of Palestine](), Palestine — *Teaching Assistant*

09/2017 - 06/2018

Discuss and practice the abstract side of the Software Engineering materials, Ex, Programming, Data Structure, Software Architecture and networking in a practical way.

EDUCATION

[University Of Palestine](), Palestine—Bachelor degree

2012 - 2017

I have studied Software Engineering for five years in the University of Palestine and graduated first degree and I have been chosen to take a role as a teaching assistant for one year after.

SKILLS

Vanilla Javascript.

Nodejs
ExpressJs
WebRtc,Socket.io
Restful API Design
SQL(postgres,mySql,oracle)
NoSql(mongodb)
AWS(s3.ec2,ecs,fargate)
CI/CD pipeline

STATEMENT

It's a fulfilling feeling when you know that you have the skill to build something that can resolve an issue for a group of people, or build a solution that could change someone's life, or makes their life easier. With a few lines of code you can save tons of wasted hours of other people's lives (automation).
